

Aisha Rahman

Profile

Chemical Engineering student with hands-on experience in Python, MATLAB and GMP.

Work History

Process Development Intern, Charles River

Therapeutics

Jun 2026 – Aug 2026

- Ran HPLC assays and documented results under GMP for a gene therapy program
- Built a Python tool for process simulation of a tangential flow filtration step

Research Assistant, Bay State Institute of

Technology

Sep 2025 – Present

- Simulated crystallizer kinetics in MATLAB and Aspen Plus

Education

Bay State Institute of Technology

Boston, MA

Bachelor of Science, Chemical Engineering

Expected May 2028

Cumulative GPA 3.93/4.00

Selected Projects

Green Solvent Screening

- Screened 30 solvents for a greener extraction route
